

# AIR CURTAINS

## Description

The new and attractive generation of Airtècnics air curtains are the ideal solution to maintain a comfortable interior climate in commercial outlets and public buildings that need to keep their doors opened.

Airtècnics air curtains create an air stream layer over the doorway and act as an invisible barrier which efficiently divides the inside environment from the outside one. Therefore, it substantially reduces heating and cooling costs up to 80%, while increasing employees and clients comfort.

For shops, Airtècnics air curtains allow a clear view of the inside of the shop, welcoming the client to enter easily and freely. The end result is

more customers and an increase in sales. Airtècnics air curtains are a protection from the cold and heat, repel gusts of wind and minimize dust, fumes, pollution and insects entering the building.

In order to obtain these advantages it's very important to choose the appropriate air curtain. Factors such as interior drop, strong winds, the door's location, stairs between floors, opposite doors, and the installation height have to be taken into consideration.

Our expert consultants with their extensive experience are at your disposal to help you choose.

## Advantages

### MAINTAINS:

- Heating levels
- Refrigeration
- Air conditioning
- Comfort
- Clean atmosphere

### PROTECTS FROM:

- Cold winter temperatures
- Hot summer temperatures
- Car fumes
- Dust in the air
- Pollution
- Bad smells and odours
- Insects

## Selection of an air curtain

To select an air curtain the following factors have to be kept in mind:

- The height of the installation measured from the discharge diffuser to the floor
- The width of the door
- The location of the building to determine the level of protection needed against weather conditions
- If the building has several doors in the same, different or opposite facade
- If the building has several stores connected by escalators
- Pressure differences between the inside and outside of the building
- Door characteristics: if always open, if automatic door, manual door, revolving door, etc.
- Characteristics of the ventilation and air conditioning installation
- Voltage and electrical power availability
- Type of business, style and decoration of the premises

## Applications

Model	Kind	Recommended Installation Height (*)	Heating A    E    P	Common Applications
Minibel		Up to 1,8 m	•    •	Kiosks, Fast Food and small sized shops. Restaurants and places with usually closed door or automatic door when low pedestrian flow.
Optima Recessed Optima		2,2 - 2,8 m	•    •    •	Small and medium sized premises. Restaurants, shops and places with a medium and high pedestrian flow. Creation of different environment zones. Protection against dust, fumes, pollutants and insects. False ceiling installations. Isolation and sealing of smoking areas.
Windbox, Recessed Windbox				
Smart	M, ECM	2,5 - 3,5 m	•    •    •	
Zen				
Rund				
Deco				
Dam	G	3,0 - 3,8 m	•    •    •	Medium and large sized premises with a high pedestrian flow. Protection against dust, fumes, pollutants and insects. Cold rooms. False ceiling installations. Isolation and sealing of smoking areas.
Recessed Dam				
Windbox DX				
Invisair				
Rotowind	ECG	3,2 - 4,2 m	•    •    •	
Variwind				
Recessed Compact (A)				
Kool (A)				
Triojet		2 - 3 m	•	Industrial doors for large cold rooms and freezers with very low temperatures or problems with ice production.
Windbox	L	4 - 5 m	•    •    •	Medium and large sized premises with a high pedestrian flow. Industrial doors. Protection against dust, fumes, pollutants and insects. Cold rooms. False ceiling installations.
	XL	5 - 7 m	•    •    •	
Maxwell				
Max		4 - 6 m	•    •    •	Industrial doors. Loading dock. Vertical Installation to one side of the door or at each side of the door. Horizontal Installation.

(\*) The maximum height of installation depends on the conditions of the premises. Contact us to clear up your queries or doubts.

(A) Air Only, (E) Electrical Heating, (P) Water Coil Heating LPHW.

## Characteristics

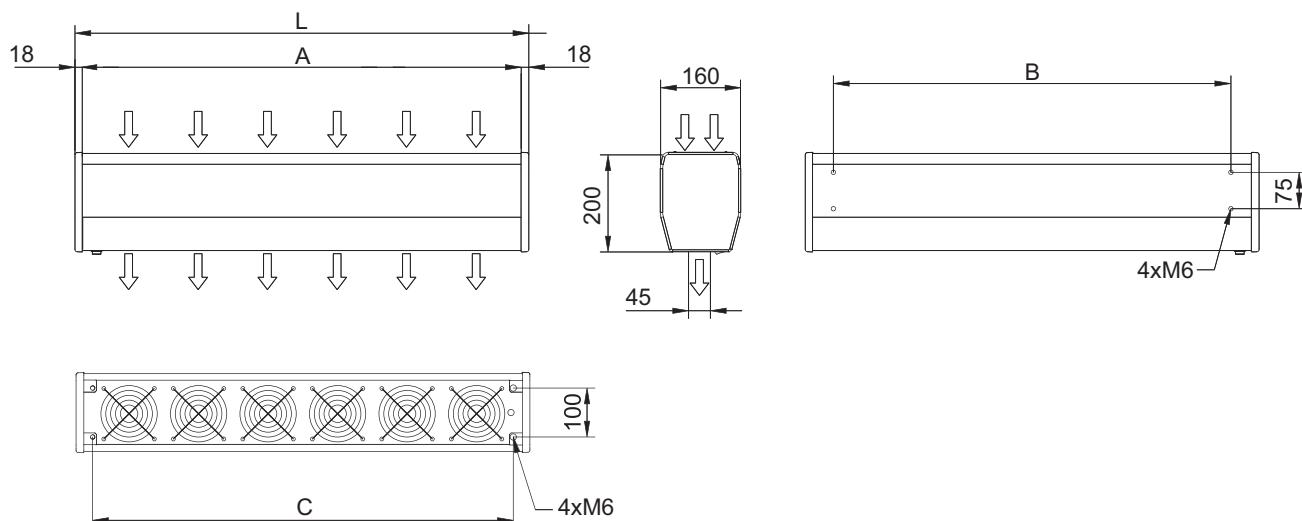

- Self-supporting casing construction made of galvanized plated steel, painted epoxy-polyester structural white colour RAL 9016 as standard. Other colours are available on request.
- Low noise compact axial fans.
- "E" type with heating includes electrical shielded element. "A" type is without heating, air only.
- Linear blow-out jets with airfoil profiled anodized aluminium vanes.
- Integrated switch for ventilation and heating control.
- Cable connection 1,5m length, integrated.
- Wall support included.

Water heated: connection pipes P86 and P64 are 2x3/4" female (male if lateral pipes), P54 2x1" male. P86 2 rows coil, P64 3 rows coil, P54 4 rows coil.

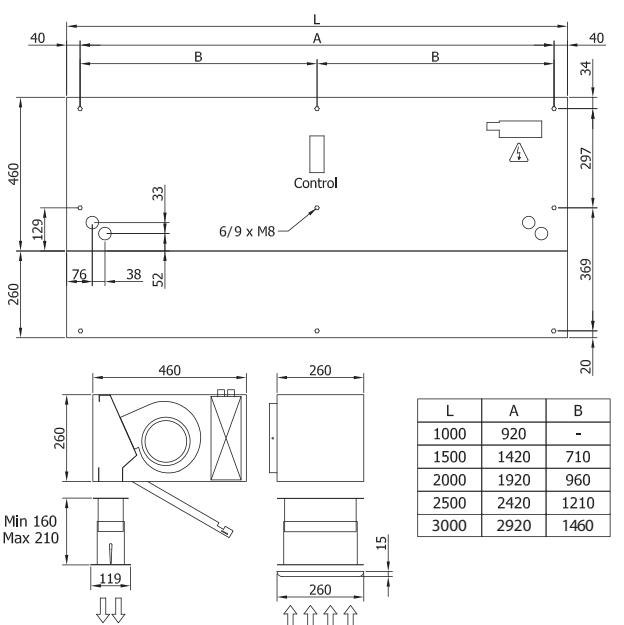

Layouts and dimensions

Free hanging mounting

Inside ceiling surface mounting

False ceiling invisible mounting

## Characteristics

- Self-supporting casing construction made of galvanized plated steel, ready to be installed recessed in a false ceiling.
- Inlet grille (free of maintenance) made with aluminium profiles and blow-out nozzle, integrated in a single white frame, colour RAL 9016. Other colours are available on request.
- Double-inlet centrifugal fans driven by an external rotor motor with built-in thermal protection contact provided with 5-speed selection. Very low noise level.
- "P" type with water heated coil. "E" type with electrical shielded elements, 3 stages with power switches. "A" type without heating (only air). Optional expansion DX coil.
- Anodized aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Included: Plug&Play control, infrared remote IR, 7m telephone cable. Optional Clever control: Automatic, intelligent, energy saving, Modbus RTU for BMS...

# RECESSED WINDBOX | High Pressure Recessed Air Curtains For Commercial And Industrial Doors

## Dimensions

	L	L1	A	B
Recessed Windbox 1000	1000	1050	920	-
Recessed Windbox 1500	1500	1550	1420	710
Recessed Windbox 2000	2000	2050	1920	960
Recessed Windbox 2500	2500	2550	2420	1210

## Characteristics

- Stylish, discreet and contemporary design adaptive to any interior architecture.
- Smooth front panel with hidden top air entrance, avoiding the inside view of the unit and the inlet grille with the filter.
- Self-supporting steel rounded casing with edgeless plastic side covers, finished in epoxy-polyester paint white RAL 9016 as standard.
- Front panel can be customized with logotypes, lighting, lettering or safety and informative signals, according to the client requirements.
- Low noise centrifugal fans, outer rotor type, with built-in thermal protection contact. Provided with 5-speed selection.
- "P" type with water heated coil. "E" type with electrical shielded elements, 3 stages with power switches. "A" type without heating (only air). Optional expansion DX coil.
- Airfoil shaped anodized aluminium outlet vanes, adjustable from 0 to 15° each side.
- Included: Plug&Play control, infrared remote IR, 7m telephone cable. Optional Clever control: Automatic, intelligent, energy saving, Modbus RTU for BMS...

## Dimensions

## Finishes and Details

## Characteristics

- Decorative air curtain in contemporary architectural style. Its minimalist and smart design integrates in any environment and we offer the option to customize, meeting our clients need.
- Can include personalized logos, signs or graphic designs. It can even incorporate clocks, lighting, etc.
- Front panels are anodized aluminium. Options for stainless steel and gloss, matt or brushed paint finishes. Other materials are possible, as wood, metal, etc.
- Central structure made of steel finished in black forge as standard. Other colours available on request.
- Centrifugal double-inlet fans with external rotor motors, with built-in thermal protection contact, provided with 5-speed selection. Very low noise level.
- "P" type with water heated coil. "E" type with electrical shielded elements, 3 stages with power switches. "A" type without heating (only air). Optional expansion DX coil.
- Anodized aluminium outlet vanes, airfoil shaped, adjustable each side.
- Included: Plug&Play control, infrared remote IR, 7m telephone cable. Optional Clever control: Automatic, intelligent, energy saving, Modbus RTU for BMS...

Water heated: connection pipes P86 and P64 are 2x3/4" female (male if lateral pipes), P54 2x1" male. P86 2 rows coil, P64 3 rows coil, P54 4 rows coil.

## Dimensions

## Finishes

Examples of customised  
front panels, to meet  
customers needs

- Painted any RAL colour or metal
- Different materials: Aluminium, stainless steel AISI 304 (brushed or polished), wood, glass, PVC/PES, etc.
- Logos, lights, clocks, signs, vinyls, patterns, etc.

## Characteristics

- Decorative rounded air curtain for vertical or horizontal installation.
- Faceted self-supporting casing construction made of galvanized plated steel, finished in structural epoxy-polyester white RAL 9016 or silver grey RAL 9006 as standard. Other colours or stainless steel construction are available on request.
- Double-inlet centrifugal fans with external rotor motors, with built-in thermal protection contact, provided with 5-speed selection. Very low noise level.
- Perforated inlet grille with filter functions and easy service. It does not need prefilter.
- "P" type with water heated coil. "E" type with electrical shielded elements, 3 stages with power switches. "A" type without heating (only air). Optional expansion DX coil.
- Anodized aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Included: Plug&Play control, infrared remote IR, 7m telephone cable. Optional Clever control: Automatic, intelligent, energy saving, Modbus RTU for BMS...

## Characteristics

- Structure made of aluminium profiles and galvanized plated steel panels, finished in structural epoxy-polyester white RAL 9016 or silver grey RAL 9006 as standard. Other colours are available on request.
- Double-inlet centrifugal fans driven by an external rotor motor with built-in thermal protection contact. Provided with 5-speed selection. Very low noise level.
- Micro-perforated inlet grille with filter functions and easy service. It does not need prefilter.
- "P" type with water heated coil. "E" type with electrical shielded elements, 3 stages with power switches. "A" type without heating (only air). Optional expansion DX coil.
- Anodized aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Included: Plug&Play control, infrared remote IR, 7m telephone cable. Optional Clever control: Automatic, intelligent, energy saving, Modbus RTU for BMS...

## Characteristics

- Self-supporting casing construction made of galvanized plated steel, finished in structural white RAL 9016 as standard. Other colours or stainless steel construction are available on request.
- The inlet areas are located behind the front panel. They do not need maintenance.
- Front panel with option to customize and the possibility of including personalized logos, signs, graphic designs, images, etc.
- Double-inlet centrifugal fans driven by an external rotor motor with built-in thermal protection contact provided with 5-speed selection. Very low noise level.
- "P" type with water heated coil. "E" type with electrical shielded elements, 3 stages with power switches. "A" type without heating (only air). Optional expansion DX coil.
- Anodized aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Included: Plug&Play control, infrared remote IR, 7m telephone cable. Optional Clever control: Automatic, intelligent, energy saving, Modbus RTU for BMS...

Water heated: connection pipes P86 and P64 are 2x3/4" female (male if lateral pipes), P54 2x1" male. P86 2 rows coil, P64 3 rows coil, P54 4 rows coil.

## Dimensions

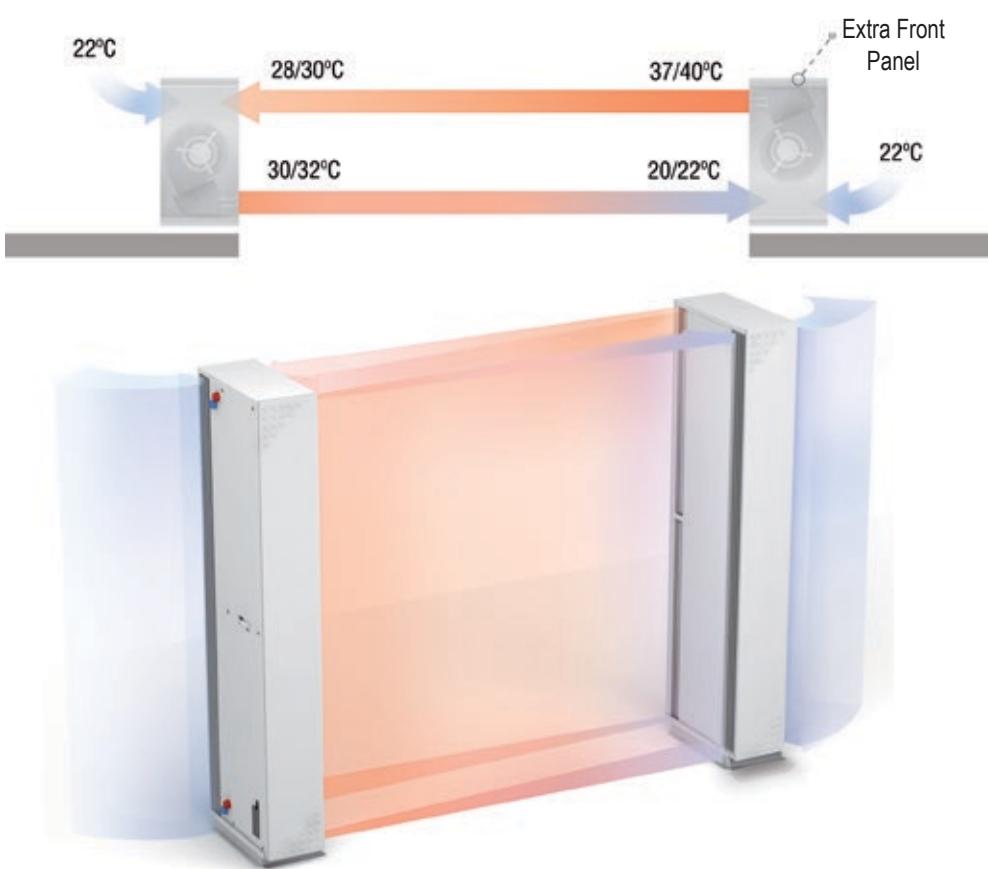

## Dam Twin System

The DAM TWIN system consists of two vertical DAM air curtains face to face, one with the air jet ahead and the other behind.

At the end of each jet there is the inlet of the other air curtain helping to close the air barrier.

This double jet works as a closed circuit creating a separation zone at the door entrance.

DAM TWIN system is an optimal solution for installations with very adverse conditions.

## Characteristics

- Compact and low profile recessed air curtain with full grille view.
- Self-supporting casing construction made of galvanized plated steel, ready to be installed recessed in a false ceiling.
- Inlet grille (free of maintenance) made with aluminium profiles and blow-out nozzle, integrated in a single white frame, colour RAL 9016. Other colours are available on request.
- Double inlet centrifugal fans driven by an external rotor motor with built-in thermal protection contact provided with 5-speed selection. Very low noise level.
- "P" type with water heated coil. "E" type with electrical shielded elements, 3 stages with power switches. "A" type without heating (only air). Optional expansion DX coil.
- Included: Plug&Play control, infrared remote IR, 7m telephone cable. Optional Clever control: Automatic, intelligent, energy saving, Modbus RTU for BMS...

## Heat Pump Technology

Heat pump is a device that uses a small amount of energy to move heat from one location to another. This system is extremely efficient because it simply transfers heat, rather than burn fuel to create it. It consists of a closed circuit through which a special fluid (refrigerant) flows. This fluid takes on a liquid or gaseous state according to temperature and pressure conditions. The circuit is composed by: compressor, condenser, expansion valve and evaporator.

## Advantages and Benefits

The new Airtectrics Heat Pump Air curtains are absolutely efficient reducing the heating cost and CO<sub>2</sub> emissions up to 70%.

- Very high energy efficiency ratings to save big amounts of money on your energy bill
- Short Payback Period thanks to very high level of energy saving
- Heating and cooling included in the same system (reverse cycle)
- Environmentally Friendly as uses such low amounts of energy

Available Airtectrics Heat Pump Air Curtains:

- Heating/Cooling: Windbox MGLXL, Dam, Recessed Windbox, Wec, Rec, Variwind VW and Duojet.
- Only Heating: Deco, Rund, Zen, Rotowind, Variwind VP and Invisair.

## Heat Pump vs Electrical Air Curtain - Energy Saving Example

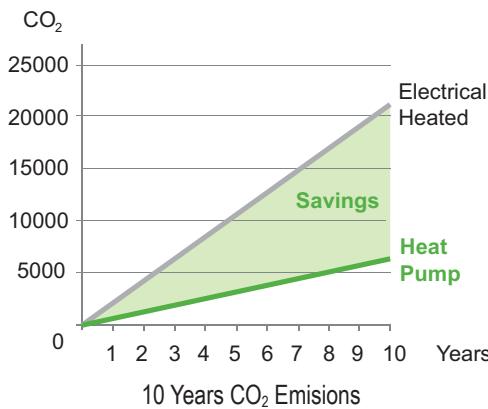

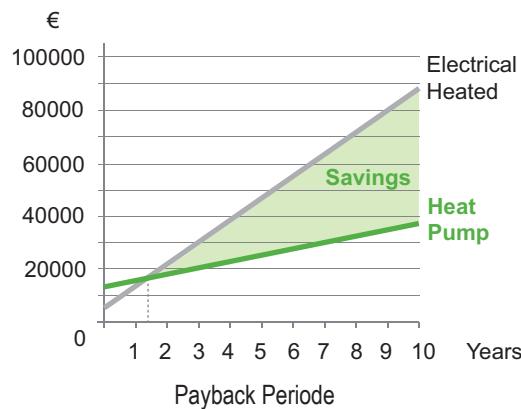

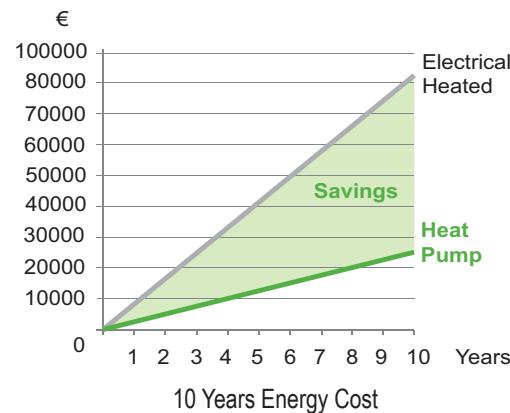

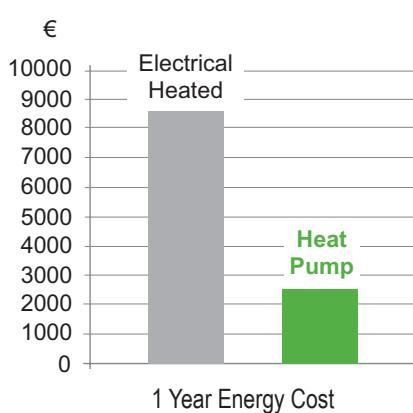

How much money can I save using a Heat Pump Air curtain?

Example:

Door dimension: 2 m width by 3 m height  
Running time: 12 hours/day, 6 days/week, 26 weeks (~ 1/2 year)  
Energy cost: 0,17 €/kW/h (EU-27 average cost)  
Selected unit: G 2000, 27kW  
COP: 3,31 (Coefficient of Performance)

	Electrical Air Curtain	Heat Pump Air Curtain	Difference
Total Heating Power	27 kW	27 kW	0 kW
Air Curtain Price	3.828 €/unit	11.761 €/unit	+ 7.933 €
Energy Consumption	50.544 kWh	15.270 kWh	- 35.274 kWh
Energy Cost	8.592 €	2.596 €	- 5.996 €
CO <sub>2</sub> Emissions	20.218 kg	6.108 kg	- 14.110 kg

Result: The payback period is 1,32 years. We recover the price increase of Heat Pump air curtain in nearly 16 months and then we start saving money. From the beginning we save energy and reduce CO<sub>2</sub> emissions to the environment.

## Characteristics

- Energy saving heat pump air curtains: up to 70% reduction in costs and CO<sub>2</sub> emissions (in heat/cool mode).
- Self-supporting casing construction made of galvanized plated steel, finished in structural epoxy-polyester RAL 9016 as standard. Other colours or stainless steel construction are available on request.
- Double-inlet centrifugal fans driven by an external rotor EC motor with built-in thermal protection contact. Provided with 5-speed selection. Very low noise level.
- Micro-perforated inlet grille with filter functions and easy service. It does not need prefilter.
- Low turbulence discharge nozzle with double blow-out vane, airfoil shaped, adjustable from 0 to 15° each side.
- Includes direct expansion coil with sensors. Optional condensate water pump.
- Plug&Play control panel, infrared remote IR and 7m telephone cable included.
- DX Interface KIT with TOSHIBA programmable control.
- TOSHIBA Digital Inverter outdoor heat pump unit (R410A) with expansion valve.

## Characteristics

- Energy saving heat pump air curtains: up to 70% reduction in costs and CO<sub>2</sub> emissions (in heat/cool mode).
- Self-supporting casing construction made of galvanized plated steel, finished in structural epoxy-polyester RAL 9016 as standard. Other colours or stainless steel construction are available on request.
- Double-inlet centrifugal fans driven by an external rotor EC motor with built-in thermal protection contact. Provided with 5-speed selection. Very low noise level.
- Micro-perforated inlet grille with filter functions of easy service. It does not need prefilter.
- Low turbulence discharge nozzle with double blow-out vane, airfoil shaped, adjustable from 0 to 15° each side.
- Includes direct expansion coil with sensors. Optional condensate water pump.
- Plug&Play control panel, infrared remote IR and 7m telephone cable included.
- HITACHI DX Interface KIT with expansion valve and programmable control.
- HITACHI Reversible DC Inverter outdoor heat pump unit (R410A).

# WINDBOX L,XL | High Pressure Air Curtains For Commercial And Industrial Doors

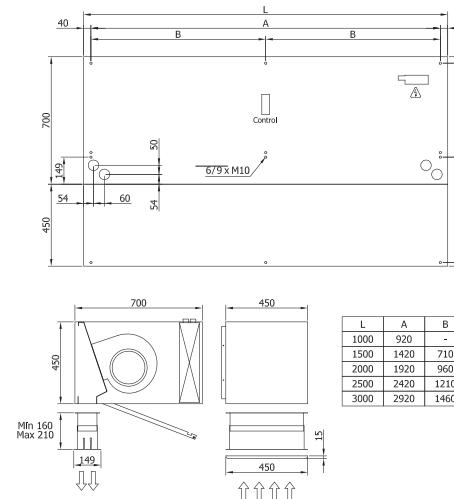

## Layouts and dimensions

Free hanging mounting

Inside ceiling surface mounting

False ceiling invisible mounting

## Grille Finishes

Industrial

Decorative

## Characteristics

- Specially designed for applications where the body of the air curtain is to be installed inside a column or bulkhead for architectural reasons. It can be vertically or horizontally mounted.
- Invisair air inlet and discharge grille are at the same level. Thus, the air flow through the unit follows a straight direction. Inlet area when installation inside a bulkhead or column should be designed with suitable grille provided by others.
- Two anodized aluminium adjustable lamellas, airfoil shaped, so that air discharge direction can be adjusted to 0 – 15 degrees either side.
- Structure made of galvanized plated steel finished in structural epoxy-polyester white RAL 9016 as standard. Other colours are available on request.
- Double-inlet centrifugal fans driven by an external rotor EC motor with built-in thermal protection contact. Provided with 5-speed selection. Very low noise level.
- "P" type with water heated coil. "E" type with electrical shielded elements, 3 stages with power switches. "A" type without heating (only air). Optional expansion DX coil.
- Included: Plug&Play control, infrared remote IR, 7m telephone cable. Optional Clever control: Automatic, intelligent, energy saving, Modbus RTU for BMS...

Water heated: connection pipes P86 and P64 are 2x3/4" female (male if lateral pipes), P54 2x1" male. P86 2 rows coil, P64 3 rows coil, P54 4 rows coil.

## Layouts and dimensions

(\*) IN/OUT Water pipes connection (in water heated units)

## Installation examples

## Characteristics

- Specially designed to be installed in all type of revolving doors. Two possible layouts, tailored dimensions.
- Structure made of galvanized plated steel, finished in structural epoxy-polyester white RAL 9016 as standard. Other colours are available on request.
- Double-inlet centrifugal fans driven by an external rotor EC motor with built-in thermal protection contact. Provided with 5-speed selection. Very low noise level.
- Perforated inlet grille with filter functions and easy service. It does not need prefilter.
- "P" type with water heated coil. "E" type with electrical shielded elements, 3 stages with power switches. "A" type without heating (only air). Optional expansion DX coil.
- Circular anodized aluminium outlet vanes, airfoil shaped.
- Included: Plug&Play control, infrared remote IR, 7m telephone cable. Optional Clever control: Automatic, intelligent, energy saving, Modbus RTU for BMS...

Water heated: connection pipes P86 and P64 are 2x3/4" female (male if lateral pipes), P54 2x1" male. P86 2 rows coil, P64 3 rows coil, P54 4 rows coil.

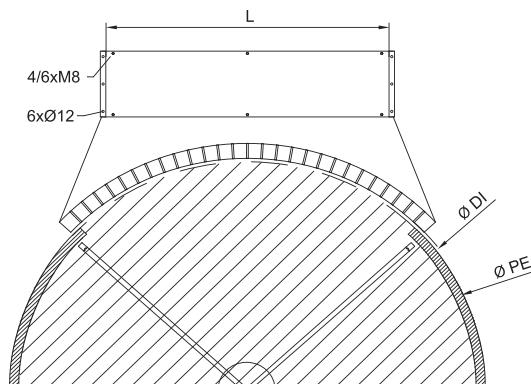

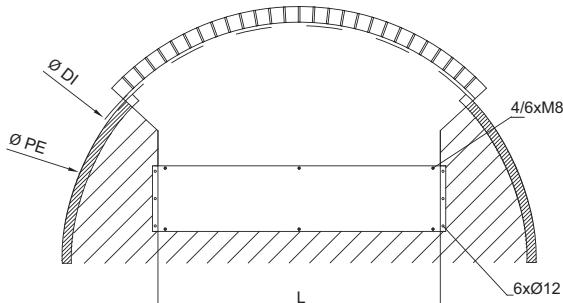

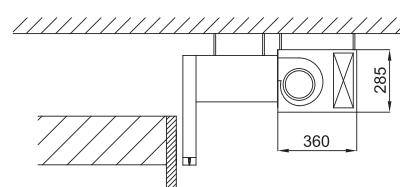

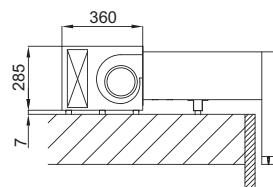

## Layouts and dimensions

RotoWind air curtains are tailor-made for any kind of revolving door according to the following layouts:

On top mounting

False ceiling mounting

Fixation system

Fixed onto the door

Hanging from the ceiling

Optional decorative front cover

1. RAL 9016 standard
2. Colour from RAL palette
3. Stainless Steel AISI 304

## Characteristics

### VP (with profiles)

### VW (windbox construction)

- Designed to be tailor-made, adaptable to any customer's needs.
- Option VP: Structure made of aluminium profiles and galvanized plated steel panels, finished white RAL 9016 as standard. Other colours are available on request. VP construction allow the service from the top and the bottom.
- Option VW: Self-supporting casing construction as Windbox MG, made of galvanized plated steel, finished in structural epoxy-polyester RAL 9016 as standard. Other colours or stainless steel construction are available on request.
- Centrifugal double-inlet fans driven by an external rotor EC motor with built-in thermal protection contact. Provided with 5-speed selection. Very low noise level.
- "P" type with water heated coil. "E" type with electrical shielded elements, 3 stages with power switches. "A" type without heating (only air). Optional expansion DX coil.
- Anodized aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Included: Plug&Play control, infrared remote IR, 7m telephone cable. Optional Clever control: Automatic, intelligent, energy saving, Modbus RTU for BMS...

## Specifications

The performance of Variwind air curtains is the same as Windbox M, ECM,G and ECG.

There all types from 1000 to 3000 mm length. It's available unheated, water heated, electrical heated or with heat pump.

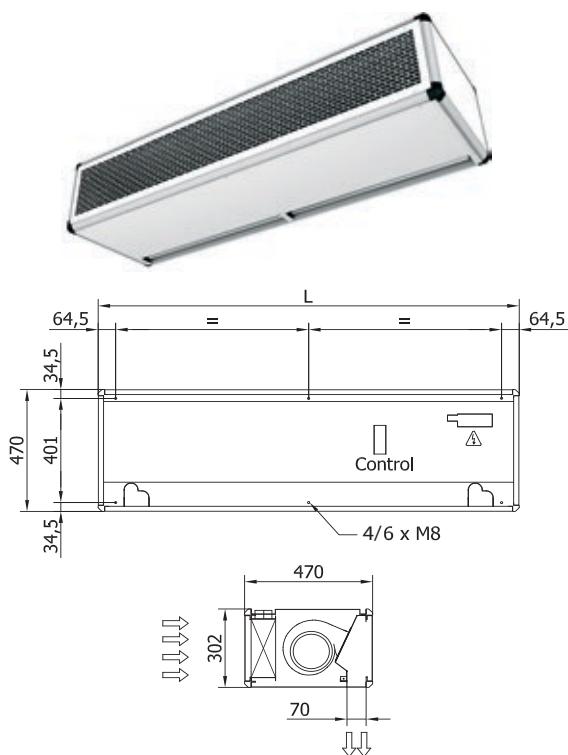

## Layouts and dimensions

VariWind air curtains can be tailor-made at the request of the customers in any length from 1045 mm to 3000 mm.

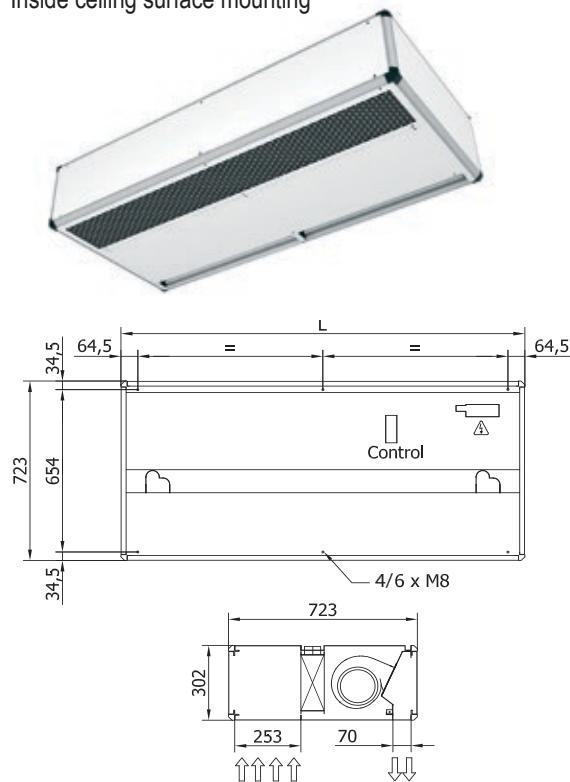

Example: Standard Variwind 1500 will have similar performance as Windbox 1500 (air volume, heating, consumption, etc...). Depending on how many mm we add to the nominal dimension 1500mm, we could put more fans and power heating if required (consult if possible).

	Standard L (mm)	Customised L (mm)
Variwind 1000	1045	1045-1544
Variwind 1500	1545	1545-2049
Variwind 2000	2050	2050-2549
Variwind 2500	2550	2550-3000

Free hanging mounting

Inside ceiling surface mounting

# RECESSED COMPACT

Compact Recessed High Velocity Air Curtains  
For Commercial and Industrial Doors

## Characteristics

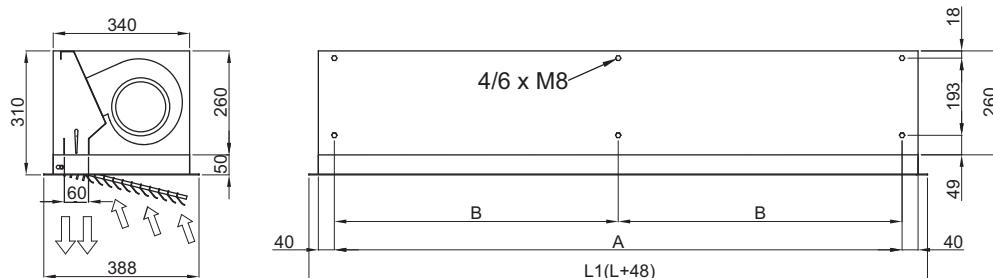

- Compact and low profile recessed air only air curtain with full grille view, specially designed for applications without heating.
- Self-supporting casing construction made of galvanized plated steel, ready to be installed recessed in a false ceiling.
- Inlet grille (free of maintenance) made with aluminium profiles and blow-out nozzle, integrated in a single white frame, colour RAL 9016. Other colours are available on request.
- Double inlet centrifugal fans driven by an external rotor motor with built-in thermal protection contact provided with 5-speed selection. Very low noise level.
- Included: Plug&Play control, infrared remote IR, 7m telephone cable. Optional Clever control: Automatic, intelligent, energy saving, Modbus RTU for BMS...

# TRIOJET SYSTEM | Air Curtains Combination System with Multijets

For Large Cold Stores And Freezers

## Characteristics

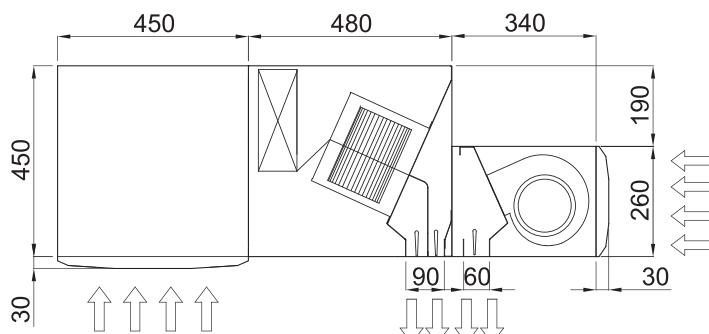

- Specially designed to be installed on big doors of industrial cold stores and freezers.
- System composed by two air curtains: Special Duojet air curtain with plenum and Kool. The result is a combination system of 3 jets at different temperatures and different speeds.
- Structure support with lateral walls to cover 100% of the opening with 3 jets should be provided by others.
- High efficiency barrier against big amount of thermal losses due to a big temperature difference (shorter payback).
- Avoid mist and ice, decreasing risk of accidents.
- Casing construction made of galvanized plated steel, finished in structural epoxy-polyester RAL 9016 as standard. Other colours or stainless steel construction are available on request.
- Anodized aluminium outlet vanes, airfoil shaped, adjustable from 0 to 15° each side.
- Duojet with IP55 AC centrifugal fans and Kool with EC fans (both double inlet, external rotor motors and built-in thermal protection contact). Provided with 5-speed selection. Very low noise level.
- Includes electrical shielded element, 3 power stages with power switches included.
- Triojet automatically fully controlled by Clever Control. Electronics and controllers inside IP65 box. Plug & Play. Ready for BMS connection via Modbus RTU.

## Specifications

## Dimensions

## Characteristics

- High performance heavy duty industrial air curtains for vertical and horizontal installations, available in 1.5, 2.0 and 2.5 meters length. Easy dockable modules to reach large dimensions.
- Self-supporting galvanized steel plate housing, powder-coated in white RAL 9016 as standard. Other colors are available on customer request.
- High efficiency and extremely low noise axial fans driven with external rotor motor, single phase 230V/50Hz. Optionally three phase 400V/50Hz. Maintenance free.
- "P" type with water heated coil up to 120°C (3-4-bar). "A" type without heating (only air).
- Double outlet with Coanda effect to achieve larger and efficient air jet. Adjustable pitch angle outlet vanes, airfoil shaped.
- Different control options, from simple ON/OFF to fully automatic. Optional: Basic regulation with Plug&play control panel, infrared remote IR and 10m telephone cable included. Advanced regulation with Clever (automatic, intelligent, energy saving, Modbus RTU for BMS, ...)

## ACCESSORIES - SPECIAL OPTIONS

### Accessories

Feet, wall or ceiling supports, tailor made arms, vibration dampers...

Thermostatic valve, solenoid valve (ON/OFF), modulating valves...

Anti-freeze sensor, door contact, ambient thermostat, external temperature sensor...

Telephone cables: RJ45, RJ11, different lengths...

### Other Options

Airtecnics, as an air curtains specialist, can produce units with special requirements under request.

Here there are some of the possibilities:

- External alarm signals as: unit working, heating ON, airflow switch, dirty grille, electronic overheating signal, fans overheating thermo contact TK, electrical heating blocked, etc...
- Special water or steam coils for higher temperatures or different power than standard
- Tailor made electrical heating elements at desired power and power supply
- Electrical heated air curtains from 400Vx3 to 230Vx3 or 230Vx1
- Dummies (empty air curtains) to combine with working units
- Industrial air curtains at 400Vx3 with the same advantages of electronic regulation 5 speed range
- Industrial MAX with higher volume (MAX L)
- Industrial MAX with explosion proof EX fans
- Stainless steel AISI-316 or other materials under request
- Special RAL colour with gloss or other finishes. Special BS (British Standard), Tiger Drylac, etc...
- Complete tailor made air curtain or our standard range customized according to client needs

Please consult us for further information or other options.

## Correction factors for water temperatures (M, G, L, XL)

The technical data tables give the nominal heat capacity for warm water coils supplied with water at 80/60°C, 60/40°C and 50/40°C with the air inlet temperature at 15°C, 18°C and 20°C.

These tables supply the corresponding factors for calculating the heat capacity with different air and water inlet temperatures.

Water			Air Inlet Temperature			Water			Air Inlet Temperature		
Coil	Difference	Temperatures	15°C	18°C	20°C	Coil	Difference	Temperatures	15°C	18°C	20°C
80/60 2 rows	20°C	100/80	1,58	1,53	1,46	50/40 4 rows	20°C	100/80	3,26	3,11	3,01
		90/70	1,35	1,27	1,22			90/70	2,79	2,64	2,54
		80/60	1,11	1,04	1,00			80/60	2,32	2,17	2,07
		70/50	0,89	0,82	0,78			70/50	1,83	1,69	1,59
		60/40	0,66	0,59	0,54			60/40	1,35	1,21	1,11
		55/35	0,54	0,47	0,42			50/30	0,85	0,68	0,58
	15°C	100/85	1,72	1,64	1,59		15°C	80/65	2,47	2,34	2,24
		90/75	1,47	1,40	1,35			70/55	2,01	1,86	1,77
		80/65	1,22	1,14	1,09			60/45	1,53	1,39	1,30
		70/55	0,97	0,90	0,86			50/35	1,05	0,91	0,83
		60/45	0,73	0,66	0,61			45/30	0,85	0,71	0,63
		50/35	0,48	0,40	0,35			10°C	60/50	1,71	1,57
	10°C	80/70	-	1,28	1,20			50/40	1,24	1,10	1,01
		70/60	1,09	1,02	0,97			40/30	0,77	0,62	0,53
		60/50	0,84	0,77	0,72						
		50/40	0,59	0,52	0,48						
		40/30	0,35	0,27	0,22						
60/40 3 rows	20°C	100/80	2,86	2,71	2,62						
		90/70	2,45	2,30	2,21						
		80/60	2,03	1,89	1,81						
		70/50	1,61	1,48	1,40						
		60/40	1,21	1,08	1,00						
		50/30	0,80	0,67	0,59						
	15°C	60/45	-	1,22	1,14						
		50/35	0,94	0,82	0,75						
		40/30	0,69	0,57	0,49						

Example of heat capacity calculation:

Model M 2000 P 80/60°C

Air inlet temperature 15°C      Water temperature 90/70°C

HEAT CAPACITY	=	Nominal Power (20,65 kW)	x	Coefficient (1,35)	=	27,87 kW
---------------	---	-----------------------------	---	-----------------------	---	----------

## EC Technology

EC technology (Electronically Commutated) combines AC and DC voltages, bringing the best of both technologies: the motor runs on a DC voltage, but with a normal AC supply.

The EC motor transforms the voltage within the motor. The non-rotating part of the motor (stator) includes an electronic PCB board which incorporates power transformation AC to DC, as well as the controls.

EC motors have no slippage losses, thus increasing efficiency versus AC motors.

## EC Motor Principle

- Permanent-magnet brushless DC motor within the rotor.
- The stator is driven by electronic switches (which replace the Carbon brushes), controlled by a microcontroller.
- Electronic system (hall effect sensor or software is used to recognize the rotor position).
- AC operate 230Vx1 or 400Vx3, valid for 50/60Hz.

## Advantages and Benefits

The new Airtechnics EC Air curtains are fascinatingly efficient reducing the running cost of the ventilation up to 67% using EC instead of AC fans.

- Energy savings : Minimum power consumption and better efficiency than AC equivalent.
- Low motor temperature : for longer lifetime than AC equivalent
- Simplicity : Electronic and power transformation are completely integrated within the motor.
- High performance: Speed can be driven up to 3600rpm.

Available EC Air Curtains: Windbox MG, Wec, Rec, Deco, Kool, Recessed Windbox, Dam, Duojet, Variwind, Rund, Zen, Rotowind and Invisair.

## EC vs AC Air Curtain - Energy Saving Example

How much money can I save using an EC Air curtain?

Example:

Door dimension: 2 m width by 3,8 m height

Running time: 12 hours/day, 6 days/week,  
50 weeks (~ 1 year)

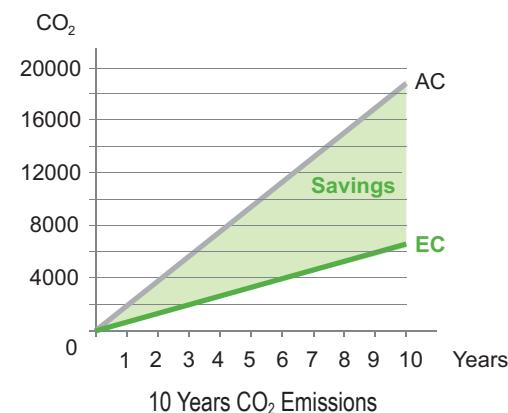

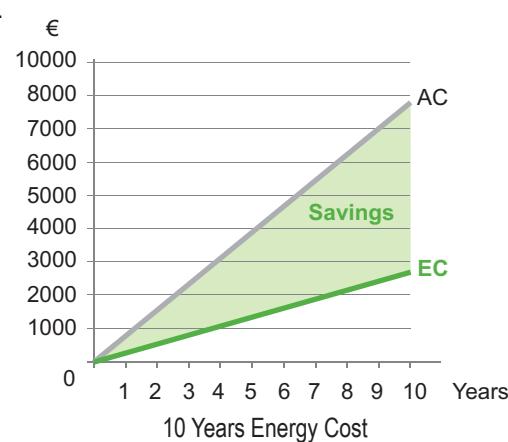

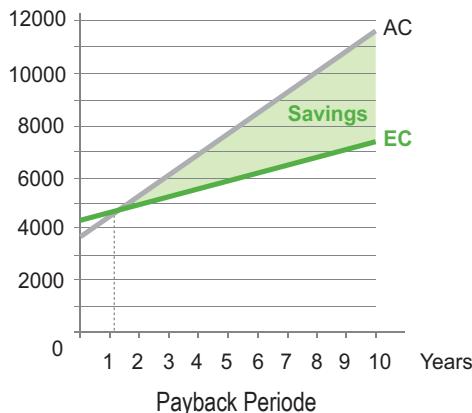

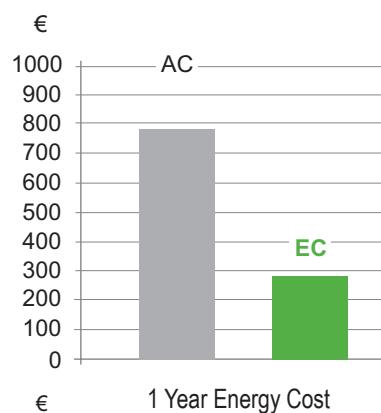

Energy cost: 0,17 €/kW/h (EU-27 average cost)

Selected unit: AC: G 2000, EC: ECG 2000

	AC Air Curtain	EC Air Curtain	Difference
Total Fans Power	1,284 kW	0,450 kW	- 0,834 kW
Air Curtain Price	2.451 €/unit	3.066 €/unit	+ 615 €
Energy Consumption	4.622 kW/h	1.620 kW/h	- 3.002 kW/h
Energy Cost	786 €	275 €	- 511 €
CO <sub>2</sub> Emissions	1.849 kg	648 kg	- 1.201 kg

Result: The payback period is 1,2 years. We recover the price increase of EC air curtain in about 1 year and then we start saving money.

From the beginning we save energy and reduce CO<sub>2</sub> emissions to the environment.

# BASIC REGULATION: Standard Controls

Two ranges of control panels, both designed for easy and quick Plug & Play connection, free of mistakes, by using a telephone cable with RJ45 connectors. The digital communication between the control panel and air curtain is a very reliable connection without information losses even at long distances. All control panels can be turned ON/OFF externally and have internal memory (if the power supply is cut off, the unit goes back to the selected state).

## 2 Speed Range Controls

Suitable for Optima and Recessed Optima air curtains. Infrared remote control included.

**CW-2AO-IR**  
Only air and water heated  
2 fan speed

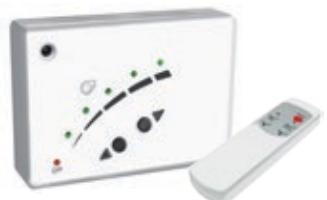

**CE-2AO-IR**  
Electrical heated  
2 fan speed  
2 heating stages

## 5 Speed Range Controls

Suitable for Windbox M, ECM, G, ECG, L, XL, Dam, Smart, Recessed Windbox, Recessed Dam, Recessed Compact, Kool, Zen, Rund, Deco, Rotowind, Invisair, Variwind, Max and Maxwell air curtains. Infrared remote control included.

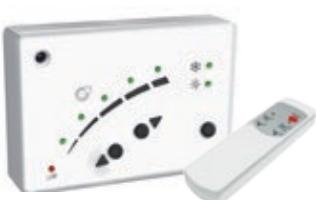

### CA-5AW-IR

Only air  
5 fan speed

### CW-5AW-IR

Water heated, 5 fan speed  
and electro-valve switch

### CE-5AW-IR

Electrical heated, 5 fan speed  
and 3 heating stages

### CD-5AW-IR

Heat pump heated, 5 fan speed  
and heating ON/OFF

## Optional Controls

### D-805 Hand / Auto

Water heated: with manual and automatic operating.  
Auxiliary functions: anti-freezing sensor, door contact  
(with delay) and room thermostat.

### TD Digital Thermostat

Only electrical heated: modifies heat  
stages and fan speed depending on  
temperature and selected program.

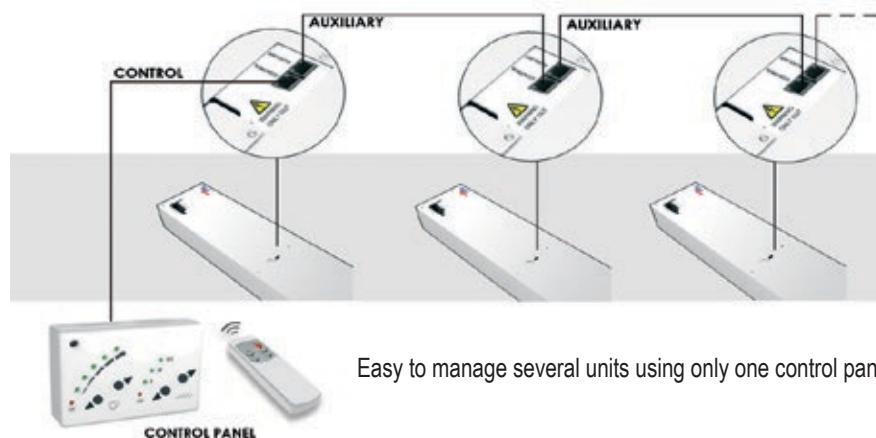

### Interface

Allows the connection to a centralized  
management system like BMS.

## Multiple air curtain connection

# ADVANCED REGULATION: Clever Control

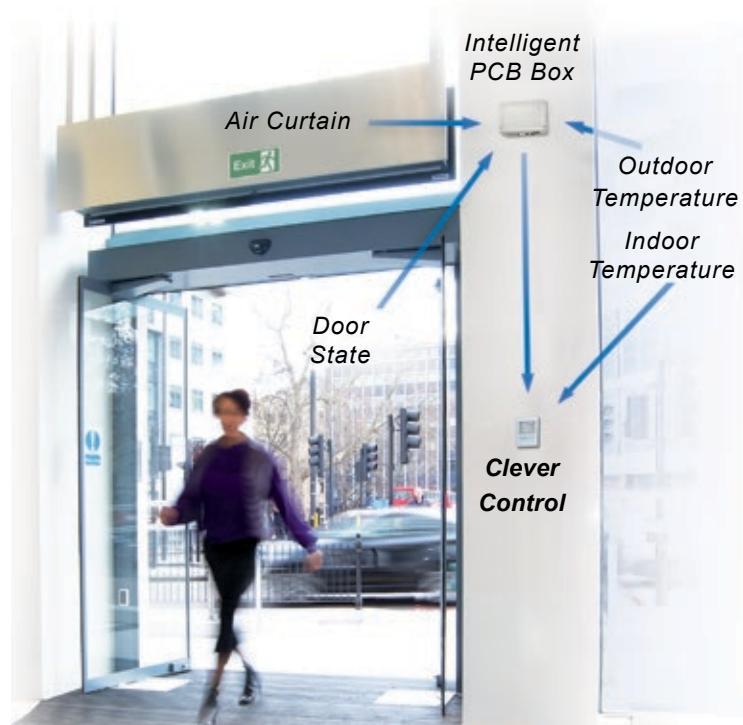

The future is here with the new generation Clever control. Maximum control with maximum energy saving.

## What is Clever Control?

Clever Control automatically adapts the functioning of the air curtain to the entrance conditions, maintaining comfort while saving energy. It optimizes the ventilation and heating to make an efficient barrier for an optimal climate separation.

It includes manual or automatic functioning with many different programs depending on heating type (water, electrical, heat pump or unheated) and installed temperature sensors.

## Clever kit includes:

### Clever Control

- Color TFT screen 2.8 inch
- 114 (h) x 85 (w) x 14 (d) mm
- Prepared for flush-mount installation

### Intelligent PCB Box

- Electronic PCB Regulation
- 218 (w) x 140 (h) x 64 (d) mm
- Varnish Protection

### PCB Power Supply

- Input: 100-240Vx1 50/60Hz (AC)
- Output: 24V 2A (DC)
- EU 2 pins / BS 3 pin plugs

### Outdoor Temperature Sensor

- Real-time temperature values
- IP65 Protection

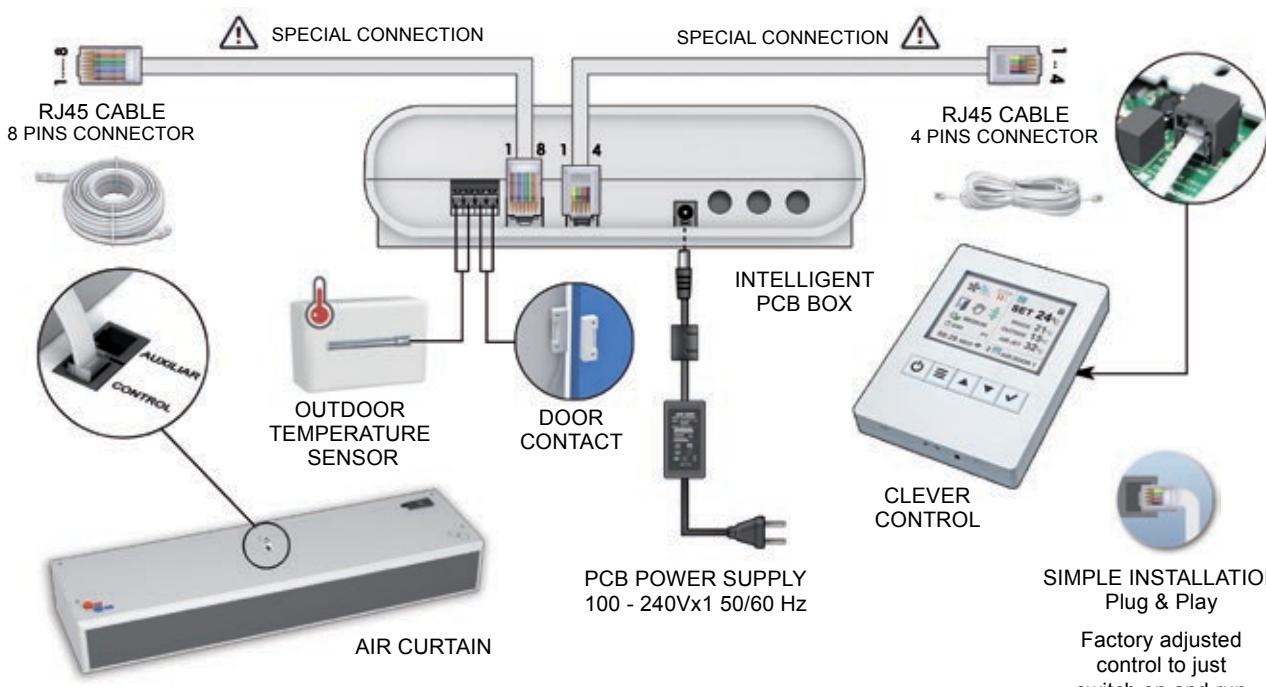

### RJ11 + RJ45 Cables

- Easy Plug & Play installation
- RJ11 (4 Pins), 7m length
- RJ45 (8 Pins), 3m length

### Door Contact

- Monitoring Door Status
- Magnetic contact

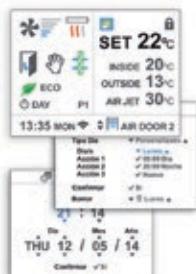

# ADVANCED REGULATION: Clever Control

Clever Control includes lots of advanced functions and extras to fulfill all client needs.

## Advanced functions:

### USER FRIENDLY DESIGN

Multilanguage and easy icons for fully understanding.  
Main state screen: Ventilation speed, heating, temperatures, door state, working mode and program, filter state, day/hour, timer, etc. 3 different menu configurations depending on who is managing the equipment: User, basic or advanced.

### ENERGY SAVING

3 grades of comfort and energy efficiency:  
“Eco” uses the less energy possible without compromising too much the comfort.  
“Comfort” spends more ventilation/heating to maintain / achieve quicker the Set temperature. “Medium” is in between.

### ADAPTIVE DOOR DELAY

When the door closes, the air curtain remains working at door open conditions for certain time to be ready if it opens again.

2 modes with two strength stages:  
“Fixed” where you define the duration  
“Flexible” which adapts automatically the time depending on how often the door is open.

### TIMER (DAY/NIGHT)

To turn ON DAY, ON NIGHT or OFF automatically the unit depending on each different day of the week or predefined groups of days.

User can select between Day or Night modes with 2 different Set temperatures in order to save energy.

### COMPATIBLE

Android or Apple smartphone application with user functions connected via WIFI.

BMS communication with Modbus RTU protocol or using digital and analogical IN/OUT to control or monitor directly the unit. Modbus TCP/Bluetooth optional modules. PC windows program (RS485)

### FILTER ALARM

Indicates when filter needs replacing/cleaning.  
2 options: by “Timer” of functioning hours or by “Pressure Sensor” switch.

### FULLY PROGRAMMABLE

All parameters can be configured at Basic or Advanced menu.

Lots of extra functions to fulfill all clients applications. Editable device names for easy identification.

### MULTI-EQUIPMENT

Clever works with different types of units: Air curtains, fan heater, AHU, etc.  
Once programmed, PCB can work by itself without any controller.  
One Clever TFT can manage up to 255 different units, each one with its own program.

## Other Characteristics:

- Clever is factory adjusted according to the devices and client requirements.
- Once installed, the system checks automatically all connected units and its temperature sensors.
- Different integrated programs and functions for particular applications.
- Different programs depending on installed temperature sensors: inside, outside and air jet.
- Able to regulate by itself the ventilation and heating depending on door state, sensors, selected mode and parameters.
- Alarms: general, filter state, anti freezing, overheating, fans overheating, airflow, fire, external, heating locked, etc...
- Security control lock option by code.
- Modulating valve for water heated (includes 24V power supply).
- Multiple functions: Temporised door, Excessive temperature of water return, cooling mode and others.

## GALLERY

**Optima**  
Installation in a shopping center

**Recessed Windbox**  
Designed to be installed  
in a false ceiling

**ZEN**  
Exclusive design and custom finishes

**Dam**  
Free hanging  
in a big mall

**Rotowind**  
Tailor-made for any  
revolving door

**Invisair**  
Invisible inbuild Column  
or bulkhead air curtain

**Rund**  
Vertical Stainless Steel  
design air curtain

**Max**
